HPE and MT-C

HPE StoreEver Tape Storage & MT-C Nodeum

Working together. Accelerating results.

A new style of partnering

Hewlett Packard Enterprise and MT-C are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, MT-C is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

MT-C has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

Product overviews

MT-C Nodeum: Nodeum is a storage data management platform. This abstraction & orchestration software consolidates silo technologies such as flash, spinning disk, tapes, and cloud into a unique file catalog. This enable the customers to focus on their business value add.

Storing digital content is now seen as a business vital requirement. The consequence is that if storing data is easy, retrieving data is still complex for users. Too much time is currently spent searching for data instead of getting values out of data. Nodeum provides a catalog that allows an easy way to manage billions of unstructured data.

Professionals are constantly trying to optimize their storage infrastructure. Next-generation storage platform combines a mix of technologies like flash, spinning disks, tapes, and cloud solutions. In doing so, our SDS management platform becomes a necessity to simplify and accelerate the access to contents in a transparent, fluid, and secure way.

HPE StoreEver Tape Storage: From the low total cost of ownership of the T950 Tape Library, to the unsurpassed storage density of the TFinity ExaScale Tape Library, HPE offers complete tape archive solutions to leading organizations around the globe, and is the worldwide leader[1] in tape drives, tape media, and tape automation. Address all your businesses long-term retention and compliance needs with HPE enterprise tape solutions, software, and services. HPE tape solutions deliver simplified management and scalability to create the ultimate solution for data preservation. Available software such as HPE StoreEver Tape Assure, Data Validation, Command View for Tape Libraries, and StoreOpen for LTFS—make HPE StoreEver more powerful and simple for data retention and archiving solutions.
